

# DHRUV GOHIL

iOS Developer — Swift & SwiftUI

+91 88797 27963 | [dhruvgohil448@gmail.com](mailto:dhruvgohil448@gmail.com) | [linkedin.com/in/dhruv-gohil](https://www.linkedin.com/in/dhruv-gohil) | [github.com/dhruvgohil448](https://github.com/dhruvgohil448)

## PROFESSIONAL SUMMARY

iOS Developer with 2+ years of experience shipping 20+ production applications, including apps used by 10,000+ active users. Deep expertise in Swift, SwiftUI, UIKit, Core Data, Auto Layout, and Core Animation, with a strong track record of integrating REST APIs, optimizing app performance, and deploying to the App Store via TestFlight. Comfortable owning a feature end-to-end within MVVM and Clean Architecture, with working cross-platform exposure through Kotlin and React Native. Focused on scalable architecture, clean code, and iOS experiences that hold up in production.

## TECHNICAL SKILLS

**Languages:** Swift, Kotlin, JavaScript, Objective-C (basic)  
**Mobile Frameworks:** SwiftUI, UIKit, Core Data, MapKit, Core Animation, Auto Layout, React Native  
**Architecture & Practices:** MVVM, MVP, Clean Architecture, RESTful API design, data synchronization, mobile app security, App Store deployment, TestFlight  
**Databases:** SQLite, Core Data, MySQL, PostgreSQL, MongoDB  
**Tools:** Xcode, Git/GitHub, CocoaPods, Swift Package Manager, Firebase, Android Studio, Linux

## PROFESSIONAL EXPERIENCE

**Junior iOS Developer — Weekend Tech LLP** Aug 2024 – Present  
*Client-services company delivering iOS/cross-platform apps; below are client projects owned end-to-end*

### Airline Crew Management App (Confidential, enterprise client)

- Shipped an enterprise iOS app used by 10,000+ active crew members, improving scheduling efficiency by 35%
- Built custom UIKit components with Auto Layout, cutting UI rendering time by 20% across iPhone and iPad
- Integrated REST APIs for real-time schedule updates, reducing crew response time by 15%
- Optimized Core Data for 50,000+ records, improving data load speed by 40%

### Boru — Subscription Commerce iOS App

- Built the full iOS UI and core functionality for a live consumer app, including recurring orders, subscription pause/resume, billing history, and delivery management
- Shipped a production-ready release to the Apple App Store for daily-essentials ordering from local vendors

### Lyncup — Meetup & Social Networking App (Australia)

- Built a scalable SwiftUI social app for meetup discovery, covering authentication, profiles, feeds, and real-time discovery via backend REST APIs
- Implemented secure onboarding and verification for an international user base; built reusable, state-driven SwiftUI components for performance and scalability

### Flying-Monk — Rental Wheelchair App, iOS + Android

- Developing across iOS (SwiftUI) and Android (Kotlin), owning UI/UX and core functionality on both platforms
- Integrating REST APIs, server-side features, and payment gateway systems

### Freelance iOS Developer — Fyre Gig

- Owned and stabilized the iOS layer of a high-traffic production React Native fintech app, resolving crashes, build issues, and performance bottlenecks
- Integrated and optimized REST APIs for real-time transactional workflows; collaborated with a cross-platform team for seamless React Native-iOS integration
- Delivered App Store-ready releases with improved stability and performance

## PERSONAL & FREELANCE PROJECTS

### krypticGrind — iOS App, SwiftUI / VisionKit / REST API

- Built a gamified competitive programming app with 500+ beta users; added AI-based recommendations that improved solve speed by 15%

### CodeNest — iOS App, SwiftUI / UIKit / REST API

- Built an app analyzing Codeforces performance across 10,000+ records; added visual insights and improved navigation, boosting daily usage by 18%

### ERP-Based Student Management System — Web App, HTML/CSS/JS/MySQL

- Built a role-based ERP for 1,000+ users covering attendance, notices, and fee payments; automated workflows cut manual workload by 40% and query optimization improved performance by 35%

### ReadBetter — iOS App, SwiftUI / VisionKit / Speech Recognition (Swift Student Challenge)

- Built a fully offline, dyslexia-friendly reading app with accessible reading modes and focus tools

### Stock Yaari – Stock F&O Signals — React Native, REST API

- Fixed complete iOS app configuration, signing, and release issues, and stabilized the update pipeline for successful App Store deployment

## EDUCATION

|                                                                                                 |      |
|-------------------------------------------------------------------------------------------------|------|
| Bachelor of Computer Engineering — Rajiv Gandhi Institute of Technology, Andheri (West)         | 2027 |
| Higher Secondary Certificate — Nirmala Memorial Foundation College of Science, Kandivali (East) | 2022 |
| Secondary School Certificate — St. Francis D'Assisi High School, Borivali (West)                | 2020 |

## CERTIFICATIONS & ACHIEVEMENTS

- Winner — Startup Battle (AI-IoT sector), among 100+ teams
- Winner — Hackathon Recursion 7.0, among 1,000+ teams
- Blockchain for Enterprise (Basics) • IoT Edge Computing & Analytics • Google Cloud Launchpad

## ADDITIONAL INFORMATION

**Languages:** English, Hindi, Marathi, Gujarati, French  
**Leadership:** CESS — Head of Event Management & Technical Secretary (2023–2025); E-Cell — Head of Corporate Relations (2023–2024); Swift Mumbai Community — Active Member & Volunteer
